PET'YE®
Essential for Fine Dining

Commercial china is the most appropriate crockery for our industry.

- Domestic china characteristics—fired at low temperatures, brittle, minimal resistance to thermal and mechanical shock, susceptible to surface crazing. Unsuitable for commercial application. Limited supply continuity.
- Commercial china characteristics—Vitrified (fired at very high temperatures—up to 1200°C—which removes moisture, and allows no moisture absorption). Vitrification produces high density. This dense body provides:
 - Resistance to thermal shock (severe temperature change).
 - Resistance to mechanical shock. Protects particularly against edge chipping, and provides impact resistance.
 - The removal of internal moisture allows no bacterial growth on minor fissures. Complies with health regulations.
 - The application of commercial glaze provides resistance to dishwasher detergent, glaze scuffing, and metal marking.
 - Continuity of supply—an important component. Replace the same item years ahead.

Our China Package

"Return on Investment" options

- **Petey**—Commercial china from the famous porcelain manufacturing region of Thailand—produced with an alumina-rich body, which provides increased strength to resist chipping. Some plates and bowls are pin fired with the usual benefits—fully glazed under-belly, light weight and slim profile for reduced storage space. satisfies a wide variety of applications—from the Classic styles designed for banqueting and functions, through to contemporary fine-dining options. Many items are covered by Conditional Lifetime Edge Chip Warranty.

Cleaning

Regular soaking of crockery with "Cutlery and Crockery Reviver" will control staining and maintain your crockery in its best possible condition.

Use & Care

Bus Function

Do not overload lowerator storage. Stack the plates to the proper level.

Do not overload bus trays.

Do arrange cups in racks.

Do sort all items in bus tray.

Do make sure you have a sufficient supply of table ware for rush periods.

Do not take more plates than you can safely handle.

Dishwasher Function

Do not use irritating pads or other plates to remove scraps.

Do not stack plates more than 16 inches high.

Do remove scraps carefully with rubber grater or water spray.

Do load same items in each dish rack.

Breakage and chipping are the result from improper use. Avoid using metal tray and improper racks. Overload by piling heavy items on lighter items, stacking too high and using other china or metal utensils to scrape dishes can all cause impact on dinnerware.

Scratches and metal marking can result from using improper metal trays, boxes, and racks. Scratches and excessive glaze wear can also occur by scratching with metal pads or abrasive cleansers, stacking hot and wet china to leave them dry.

Stains can be caused by inattention to cleaning procedures such as allowing china to remain unwashed after use, pre-soaking in water over 160 °C, improper detergent concentrations, hard water or iron content, and improper dishwasher.

To support the sales of PE'TYE products, a variety of merchandising materials are available for your use. We offer market trend merchandising brochures, catalogues. All available in our website.

Ice for the world since 1950
 Scotsman Ice Systems pioneered the development of affordable, reliable ice-making machines in the 1950's. Half a century of research, innovation and customer service later, they are the largest manufacturer of ice makers in the world, dispensing up to ten tonnes of ice a day. There are now over a million Scotsman ice makers at work, around the world.
 Scotsman holds 33 individual U.S. patents and 71 international patents for unique features that they have developed in ice machine manufacturing. They invest over 250,000 per annum in research and development.

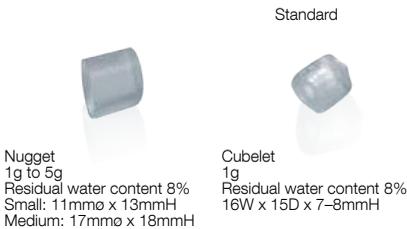

The world's choice for reliability
 Every Scotsman machine is run-tested before they send it out, making at least five batches of ice. That's why when you come to turn your Scotsman ice machine on, the very first batch of ice you make will be perfect.
 Ease of use—User friendly
 Scotsman ice makers are easy to use. The control system takes over from the moment you turn on your machine, and provides flawless operation.
